最近,Steam上一款名为《抽象主义(Abstractism)》的游戏引起了国外玩家的注意,因为这款看起来平平无奇的2D游戏竟然拥有着非常可观的CPU和GPU占有率,这是非常奇怪的。

根据介绍,这款游戏会向玩家们的电脑上安装一个木马病毒,伪装成Steam.exe进程,并在"Abstractism启动器"启动同时运行恶意软件,而这些安装的恶意软件看起来似乎是用来挖取数字货币的,同时也伴随着CPU和GPU使用率的飙升。

但开发商Okalo Union表示,硬件使用率升高是因为玩家们开启了游戏里的高质量画面选项,但就这样一款2D游戏来说,无论如何都不该拥有这样高的硬件使用率。

Item drops are now available!

7月23日 - OKALO UNION

We have finally implemented Steam item drops in Abstractism! Now you can play the game and get items.

We also want to mention, that our item drops is different to other games, because:

- Drop time is dynamic and increases after each drop (you need 15 minutes to receive the first drop, 30 minutes for the second drop, 60 minutes for the third drop and so on)
- You receive more rare items if your playtime is long ("60 minutes" item drops are better than "15 minutes" drops)
- · You can get up to 7 items every week before the drops stop
- . Drops limit resets on friday and you should be in game to allow Abstractism reset it
- Special items can be dropped on special occasions! It could be worth playing Abstractism on popular holidays

此外,这款游戏还会伪造《军团要塞》中掉落的稀有饰品,从而来欺骗玩家。图中这个火箭发射器目前Steam市场上的价格超过100美元——但那是在《军团要塞》中,在《抽象主义》这款游戏里这个物品根本不值钱。
